STAT SWAB III

EASY-TO-USE, FAST & ACCURATE

PROCEDURE:

1 Remove the test cube and the sponge collector from the foil pouch by tearing at notch. Place the test cube upright on a flat surface
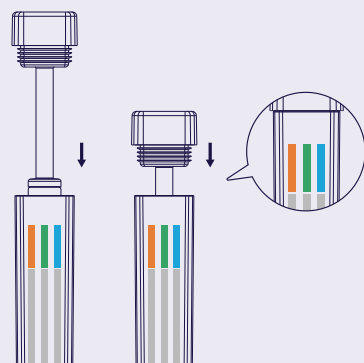

2 Put the sponge end of the collector in your mouth to collect oral fluid for 3 minutes or until the sponge is fully saturated by oral fluid. Do not chew, bite or suck the sponge. If the amount of oral fluid does not make the sponge fully saturated within 3 minutes, repeat the collection using one additional sponge collector provided, beginning with Step 1.
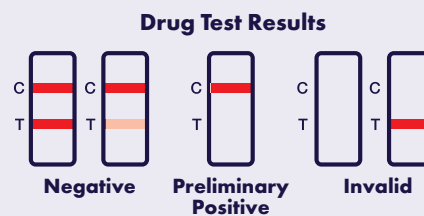

3 Minutes

3 Place the saturated sponge collector inside the test cube. Press the sponge collector down firmly until the collector cap can no longer be pressed down. Keep the test cube upright on a flat surface and follow Step 4.

Note: Make sure the sponge collector is inserted vertically

4 Interpreting Drug Test Results:
Read results at 5 minutes. Do not read after 5 minutes

Drug Test Results

Negative   **Preliminary Positive**   **Invalid**
